

SHUBHAM KUMAR

Data Analyst | SQL | Python | Power BI | Machine Learning

+91 9508626211 | skroy57099@gmail.com | Chennai, Tamil Nadu | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Entry-level Data Analyst with practical experience in SQL, Python, Power BI, and data validation across healthcare and retail datasets. Built ETL pipelines, star-schema data models, interactive dashboards, and machine learning projects using real-world data. Experienced in structured data quality review through Outlier AI and clinical data analysis during a healthcare internship. Published first-author researcher (ACS Omega) with strong analytical, documentation, and problem-solving skills. Seeking opportunities in Data Analytics, BI, or Data Science where I can contribute while continuing to grow.

TECHNICAL SKILLS

Programming: Python, SQL

Analytics & BI: Power BI, Tableau, Excel, KPI Reporting, Exploratory Data Analysis (EDA)

SQL: Joins, Subqueries, CTEs, Window Functions, Aggregations

Machine Learning: Classification, Regression, Random Forest, Feature Engineering, Model Evaluation, ROC-AUC

AI & NLP: Hugging Face Transformers, DialoGPT

Data Engineering: ETL Pipelines, Data Warehousing, Star Schema Modeling, Databricks SQL, BigQuery, PostgreSQL

Cloud & Tools: Databricks, Git, GitHub, Jupyter Notebook, VS Code

Business & Project Skills: Stakeholder, Management, Cross-functional Collaboration, Business Reporting, Documentation, Process Improvement

PROFESSIONAL EXPERIENCE

AI Language Model Trainer | Outlier AI

Jan 2025 - May 2025

Remote (US-based)

- Performed data validation and quality checks on hundreds of structured prompt-response datasets weekly, identifying factual errors, logical inconsistencies, and inaccuracies in AI-generated content.
- Applied structured evaluation criteria and scoring rubrics to assess output quality, supporting consistent and reproducible results across annotation datasets.
- Documented quality standards and feedback workflows to maintain consistency and accuracy throughout the review process.

Clinical Application Intern | Gastrolab Pvt Ltd

Jun 2024 - Dec 2024

Jalandhar, Punjab

- Coordinated multi-city EGG diagnostic camps across **Jalandhar, Amritsar, Chandigarh, and Ludhiana**, collaborating with Abbott field teams, hospitals, and gastroenterologists to ensure smooth execution of clinical operations.
- Built and maintained a structured **Excel-based patient database**, capturing patient histories and EGG results, and developed an interactive dashboard to identify abnormal trends and support physician-led case studies.
- Collected, validated, and analyzed diagnostic data, performing pre- vs post-EGG comparisons and generating insights to support clinical reporting and research activities.
- Managed relationships with **50+ gastroenterologists**, maintaining structured outreach records, tracking engagement, and coordinating follow-ups using Excel and Google Forms.
- Prepared daily operational and analytical reports for senior management and healthcare professionals, ensuring accurate documentation, data integrity, and timely communication.

PROJECTS

Blinkit Retail Analytics Pipeline | SQL / Python / PostgreSQL / Power BI / ETL

- Designed end-to-end ETL pipelines using PostgreSQL and Python to extract, transform, validate, and load retail datasets into structured, reporting-ready outputs.
- Designed star-schema data models (fact/dimension tables) and built Power BI dashboards with DAX measures for automated KPI reporting and business intelligence insight generation.

- Implemented data validation and cleansing rules to identify missing values, duplicates, and inconsistencies prior to reporting.
- Conducted exploratory data analysis to identify sales trends, category performance, pricing patterns, and business insights for decision-making.

Multi-Model Fraud Detection System | Machine Learning / Python

- Built an end-to-end machine learning pipeline using classification algorithms on financial transaction records, covering data ingestion, feature engineering, model training, and evaluation.
- Evaluated model performance using ROC-AUC, precision, recall, and threshold optimization; documented methodology for reproducibility.

Airline Flight Data Analysis & Price Modeling | Python / EDA

- Performed statistical analysis and EDA on a large flight dataset, cleaning and validating data, engineering features, and producing stakeholder-ready reports on fare variability across routes.

Conversational AI Chatbot using Transformers | Hugging Face / NLP / PyTorch

- Built a generative AI chatbot using DialoGPT and Hugging Face Transformers, implementing tokenization, context management, and response generation workflows in Python and PyTorch.

Real-World Road Surface Detection using YOLOv8 | Computer Vision

- Trained and evaluated a YOLOv8 computer vision model for pothole detection, handling dataset preprocessing, confidence threshold tuning, and performance evaluation on real-world footage.

PUBLICATION

AI-Assisted Computational Analysis for Targeted Therapeutics Optimization | First Author | ACS Omega (American Chemical Society)

Peer-reviewed research applying machine learning and statistical analysis to complex datasets, from data processing through findings communication.

EDUCATION

M.Tech, Biotechnology Lovely Professional University CGPA: 8.4 / 10	2022 - 2024
B.Tech, Biotechnology SRM University CGPA: 7.0 / 10	2017 - 2021

TRAINING & CERTIFICATIONS

- Data Analytics & Data Science Training | Besant Technologies (Jul 2025 - Present) - Python, SQL, EDA, Power BI, Machine Learning fundamentals
- Introduction to Generative AI | Google Cloud & Simplilearn | Nov 2025
- Big Data | IBM SkillsBuild | May 2026
- Databricks Academy | SQL Analytics on Databricks | Jun 2026
- Databricks Academy | AI/BI for Data Analysts | Jun 2026
